

Nautilus

The self sufficient All-in-One solution with Generator and/or water tank

To guarantee our customers maximum autonomy on construction sites or areas without water and electricity connections, our dust control machines are also available with generator and/or water tank: the so-called Nautilus solution.

This flexible all-in-one system offers efficient dust removal in every situation. control. The Nautilus solution can be used according to requirements and needs can be assembled in three easy steps:

DEVELOPED ACCORDING TO EMICONTROLS PRODUCT GUIDELINES

THE NAUTILUS ALSO GUARANTEES THE FOLLOWING ADVANTAGES:

- › Thanks to its own water tank and generator, the Nautilus can work completely independently ›
- The system can be adapted to your own needs, since the turbine ALS can also
- Water tank and generator can be chosen freely
- › dust binding can be guaranteed regardless of the local conditions › the many available options make the system extremely flexible
- › Custom-made products can also be realized on request

TYPICAL APPLICATIONS

The Nautilus solution is equipped with a generator and/or water tank and thus ideal for demolition work, construction sites, open pit mining, quarries and other work where there is no water or electricity.
