

AUTOMATION CAN MAKE YOUR LIFE SO MUCH EASIER!

Your windows and doors can provide you with great views and natural light, but they also let in the extreme Australian climate, irritating external noise, damaging ultra violet light and sometimes unwanted guests!

That's probably why you have installed or are considering installing some form of window or door protection.

But have you considered how much easier your life would be by adding a SIMU automation solution?

By automating your window and door coverings you'll have more control over your environment, providing you with a more comfortable lifestyle, better security and peace of mind.

You'll also save time by avoiding the manual rolling or winding of these coverings, and rid your home of unsightly cords, chains, winders and straps.

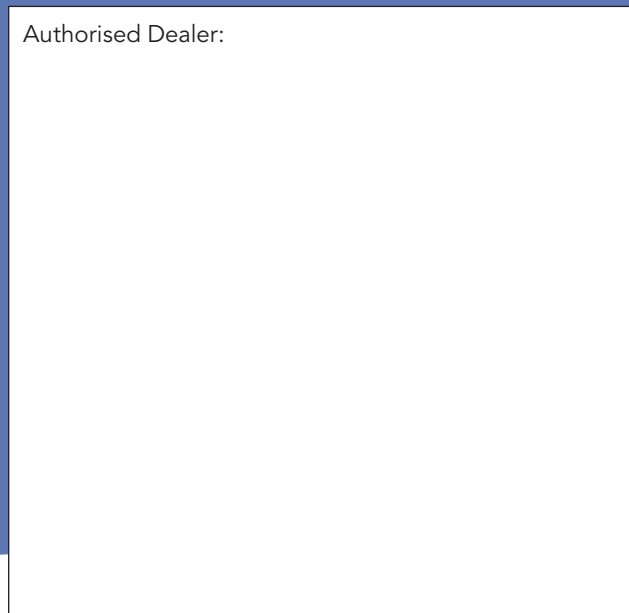

At the touch of a button your life can be so much easier with a SIMU automation solution!

YOUR BEST CHOICE FOR THE AUTOMATION OF ROLLER SHUTTERS, AWNINGS, BLINDS & HOME CINEMA SCREENS

SIMU TUBULAR MOTORS & AUTOMATION PRODUCTS

World Leaders in Automation Solutions!

WHY SIMU? INVENTORS OF THE TUBULAR MOTOR AND WORLD LEADERS IN AUTOMATION!

When considering an automation solution, you just can't roll past SIMU! Often described as a world leader in automation solutions and "The Professionals' Brand", SIMU's range of high performance tubular motors and control systems are ideal for all types of window and door coverings and other automation applications:

- Roller Shutters
- Awnings
- Internal Blinds
- External Blinds & Screens
- Home Cinema Projection Screens
- Plasma & TV Lifts

Founded in France in 1952, SIMU is the inventor of the tubular motor (1959) and unique SIMU Hz radio technology. Today SIMU currently has over 10 million motors in constant use worldwide making it a true world leader. With a reputation for technological innovation, high quality design, state-of-the-art manufacturing and reliability, it's no wonder the professionals prefer SIMU! All SIMU motors go through vigorous testing which ensures SIMU motors have the industry's lowest failure rates.

SIMU HAS A WIDE RANGE OF MOTORISATION OPTIONS TO SUIT MANY APPLICATIONS

SIMU offers a complete range of high performance tubular motors for all types of applications, from the smallest to the largest, the lightest to the heaviest.

Our wide range of SIMU motors and automation solutions include:

- Standard SIMU motors with hardwired wall mounted controls.
- SIMU Hz radio controlled motors with hand held wireless remote controls.
- Low voltage direct current SIMU motors (including solar or battery powered).
- SIMU motors with advanced electronic features including obstacle detection and favoured-position memory (including Cassette Awning applications).

SIMU also offers a wide choice of controls and automatic devices to complement your motorisation solution. SIMU products can be integrated with new or existing home or building automation solutions including C-Bus.

SIMU HAS A WIDE CHOICE OF CONTROLS AND AUTOMATIC DEVICES

SIMU also offers a wide range of functional and stylish controls and automatic devices to meet every customer's need.

Ranging from hardwired wall mounted to hand held remote controls, single channel or multi channel, most remotes are offered in a wide range of colours.

Other automatic devices include sun and wind control sensors, sun sensors and timers.

5 YEAR PRODUCT GUARANTEE

All SIMU motors and electronics are backed by a 5 Year Guarantee! Though the probability is quite low, all product faults identified will be repaired or replaced.
