## AIRPAD Chair

The synthesis of lightness: Two innovations. A new sense of lightness. The new, transparent membrane constitutes the evolution of the mesh back. It allows AirPad to float lightly in space and enhances modern, reductionist architecture. The body is kept at an ideal temperature through a high degree of moisture exchange, which prevents the build-up of heat. The membrane ensures excellent freedom of movement and provides support through fine, flexible AirPads.

Design  
Manufacture  
Create

The Body-Float synchro mechanism presents an amazing, unique body float sitting experience. Taking a seat in AirPad means gently falling back into an automatically adjusted, ideally balanced sitting position. To feel one with the chair and the environment, to get down to work and remain fresh.

**Features Swivel Chair**

- Body-Float synchro mechanism and weight adjustment
- Membrane backrest

**Features Visitor Chair**

- Cantilever frame
- Medium with armrests
- Dynamic membrane backrest
- Stacking height: 4 pieces

**Warranty**

- 10 years

**Materials in Collection**

For a complete range of product specifications for Airpad Swivel and Visitor chairs
