BACKREST MESH AND FULLY UPHOLSTERED

Both, the mesh and the upholstered backrest version of VECTOR provide the best possible support for your back, especially when sitting for long periods. For even more comfort, this model is also available with a matching headrest.

LUMBAR SUPPORT RELIEVED BACK

To reach ergonomic perfection there is the opportunity to add an additional lumbar support to both backrest options. It is adjustable in height and helps to maintain an upright posture. Furthermore, it also contributes to relieving the muscles.

ADJUSTABLE HEIGHT

SEAT DEPTH AND TILT ADJUSTMENT INDIVIDUAL SITTING

According to your needs, the basic model of the VECTOR can be upgraded with a seat depth adjustment. This allows perfect sitting for any body size. For more individualisation, the seat tilt adjustment can be selected. The right angle (over 90°) between upper body and legs enables the spine to straighten.

ADJUSTABLE SEAT TILT

MECHANISM AUTOLIFT AND SYNCHRONOUS MECHANISM

Sit well – automatically: the INTERSTUHL AUTOLIFT MECHANISM uses automatic weight adjustment to adapt to the height and weight of each individual user. Smart technology in an inconspicuous, flat housing.

Fully adjustable for perfect customisation: the INTERSTUHL SYNCHRONOUS MECHANISM makes it possible to precisely adjust the counter-pressure of the backrest to each user.

* The coat hanger can also be fixed without the headrest.

ARM RESTS STYLISH AND FUNCTIONAL

Material, design and function in harmony: the 2D and 4D T-armrests on the VECTOR harmoniously integrate into the modern appearance of the office chair. At the same time, the soft pad is robust and durable to ensure long-time usability.
