

WALTER KNOLL

Andoo Bar stool

Up, up and away: in terms of design, the Andoo Barstool is a logical continuation of the rest of the Andoo family. A metal bar serves as footrest. The low backrest also serves as a comfortable armrest if you're sitting sideways.

product design award reddot design award

The Andoo family is all about elegant proportions, materials and details. The sprung elastic backs and the pocket springs in the seat give the seating comfort of an armchair. Available with low and high backs, with or without armrests as well as with open or closed armrests. The barstool complements the programme.

Model no.

- 1144

Frame
