

WALTER KNOLL

## Liz Chair

Dynamic lines shape this chair's silhouette – charmingly emphasized by the color accents of the piping. An elastic textile under the cover spans the seat and back surfaces. Developed for flying, this high-tech material also makes Liz Chair particularly comfortable. The cover is removable.

Design  
Manufacture  
Create

This chair by Claudio Bellini has been reduced to what is most beautiful. Swaying lines define the silhouette – charmingly emphasised by the coloured piping. An elastic textile – under the cover – spans its expanses for seat and back. Developed for aviation, the high-tech material provides special comfort for Liz Chair, too. Once again pioneeringly innovative like the “Antimott” armchair by Walter Knoll from the 1930s with its special springs. The cover can be removed. A new lightness of sitting. Chairs with particularly soft upholstery, accentuated with fine drawn-ins, extend the successful range by Claudio Bellini. Relaxed sitting with the familiar lightness of the Liz family.

## Materiality

Liz Chair can be made in a variety of fabrics and leathers. Seat and back are created with a taut, elastic and at the same time stable high-tech fabric. The cover can be removed. Cover and frame are separable and recyclable. There is no relative shift between body and back pads.

Liz Chair is available with or without soft upholstery. The soft upholstered version has drawn-in sections.

## Functionality

The back of the Liz Chair is flexible

The chair is available either with or without armrests. The armrests are either open or solid. The open armrests are synthetic, in either black or silver. The version with open armrests is stackable.

The chair without armrests is available as a stackable or non-stackable version.

## Model No

- 1300

## Frame

- Steel frame. Flexible back.

## Upholstery

### • Liz 1300, 1304:

Tube diameter: 16 mm  
Layer of foam: 3 mm
