Elegant lightness

A wide range of configuration options allows an incredible amount of design freedom: for example, as a corner solution, in a U-shape or in the combination of armchair and sofa or two identical models facing each other. The timeless, reduced design language with fine craftsmanship fits into the most diverse environments: activity-based workspaces, open spaces, in the lounge or waiting area of a store or law firm, as well as in the lobby or bar of a design hotel.

The feel-good factor at work

The feel-good factor at work The world of work is changing – with feeling now playing its part even at a professional level, with intuition and gut feeling the invisible factors helping to make a decision round the table. Work not only as an obligation but also as quality time. Personal well-being and feeling good at work increase productivity and are a decisive factor for success. They enhance the attractiveness of a workplace and, not least, of the employer. After all, you are happy to stay somewhere that makes you feel good.

The Muud family - optimized space economy

The adaptable, free-standing Muud sofa is an island of well-being even for smaller-scale floor plans: soft upholstery, sumptuous cushions, an airy feel. The designers from EOOS have now come up with a scaled-down design for new uses and have managed to create complete comfort in a small space. With Muud Lite and Muud Silent, new sofas and armchairs expand the family, offering an efficient and price-sensitive solution for optimized space economy with their compact dimensions. This is sustain-ability in action: the sensible use of space and resources.

Muud Lite Armchair

- Model AU493-10
- Armchair- 4-star base.
- Rotates 360 degrees.

In cm
W 73 D 68 H 71
