SE 68 SU Stackable Chair

Design
Manufacture
Create

As the stackable version of the iconic SE 68, the SE 68 SU Stackable Chair has become the seating solution of choice for row seating within the world's greatest cultural institutions, appreciated for balancing discretion with undeniable presence. Distinguished from the SE 68 in its slightly smaller seat and the differing incline of its legs, SE 68 SU seamlessly adapts to suit the characteristics of diverse interiors, appearing as though individually designed for each environment. In doing so, it lends an expressiveness that transforms every room's composition into one of harmonious unity. SE 68 SU can be customised with upholstery, armrests, and a row-linking system on request.
