

WALTER KNOLL

Keypiece Conference Tables

The table range for modern conferencing – for daily business and the boardroom. Quality and flexibility, as a well-thought-out system of table top, legs, frame and hubs. Whether for focused individual work or in a group, Keypiece Conference Table lends itself to excellent conferencing and decision-making.

Design
Manufacture
Create

The logic of the construction follows the aesthetic of minimalism. The outer edges of the solid wood or aluminum legs and the veneered table top are subtly visible. A variety of frames allows for different table shapes. The top of Keypiece Conference Table is offered in all conceivable forms: round, boat-shaped or trapezoid, square or rectangular. A choice of surface options and soft, beveled or straight edges is available. All tables are available with three different seat widths.

Materiality

Keypiece Conference Table comes in various geometries: rectangular, boat-shaped, trapezoidal, square and round. The table tops are available in a number of materials.

Choose from three edge designs: basic, a straight edge with a table top thickness of 25 millimeters, advanced with a chamfered edge, and soft, whose soft flowing edge caresses the hand. The advanced and soft edges both have a table top thickness of 28 millimeters.

The table legs can either be made of aluminum in the variants highly polished or matt powder-coated black or of solid wood in the variants oak white pigmented, oak burned, and nutwood with sapwood inclusions.

The logic of the construction follows the aesthetic of minimalism. The outer edges of the solid wood or aluminum legs and the veneered table top are subtly visible. A variety of frames allows for different table shapes. The top of Keypiece Conference Table is offered in all conceivable forms: round, boat-shaped or trapezoid, square or rectangular. A choice of surface options and soft, beveled or straight edges is available. All tables are available with three different seat widths.

Functionality

The conference table can be equipped with connectors. Different connectors are available depending on the table top version. Cables for power and data connections can be routed through each leg in the case of aluminum legs. In the case of tables with solid wood legs, the cables are routed through the vertical cable duct either in black Congress leather or black webbing.

Table top

Shape: rectangular, boat-shaped, trapezoidal, square and round.

Table top and edge versions

Three table top versions are available.

Basic:

Micro chipboard core with straight edge for melami-ne finish: melamine soft white with ABS ending.

MDF core with straight edge for other possible finishes. Thickness: 25 mm.

Finishes: fine-textured paint, HPL laminate, fenix® or veneers from price groups IV, V.

Advanced:

MDF core with chamfered edge.

Thickness: 28 mm bevelled to 10 mm.

Bevelled edge lacquered.

Finishes:

fine-textured paint, .03 paint white, HPL laminate, fenix®, linoleum, linoleum black with silver-coloured edge no. .71 and veneers from price groups IV, V, VI.

Soft:

MDF core with soft edge.

Thickness: 28mm. Lacquered bevelled edge.

Finishes:

Available only in fine-textured paint (with integrated edge protection) and veneers from price groups IV, V, VI.

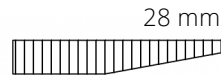

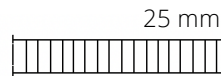

Table frame Consisting of:

Aluminium leg with integrated cable duct and synthetic cover or solid wood leg.

Leg positions: angled corner and middle legs. U-shaped conference tables have two inner corner legs.

• Beam: aluminium profile extrusion • Joint: die-cast aluminium

Aluminium Legs:

- Polished
- Powder-coated matt black
- Powder-coated matt bronze

Solid wood legs:

- Oak white pigmented, oiled (.10wo)
- Oak burned, oiled (.14wo)
- Nutwood with sapwood, oiled (.99wo)

Accessories and plug management

Accessories:

Cable ducts (for an upcharge)

Modesty panels for conference table systems (prices upon request).

Plug management:

All conference tables can be equipped with connectors.

Depending on table top version, various connectors are available.

Cable management for power and data connection is possible through each leg in case of the aluminium leg.

For the solid wood leg the cable management for power and data connection is possible through the separate vertical cable duct either in leather Congress black (4191) or black webbing (4980).

Table top version Basic with finish melamine can be equipped with Connector Netbox Line/Point.

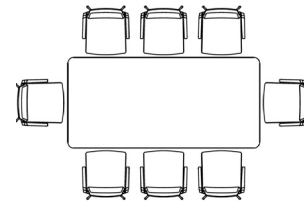

Table top version Basic (except melamine), Advanced and Soft can be equipped with other connectors.

Seat widths

To accommodate different chair widths, tables are scaled to three different seat widths (75, 80 and 85 cm). Please specify scale with the ordering number.

You will find chair widths for Walter Knoll chairs in the price list Seating & Dining.

The number of seats includes long and short sides.

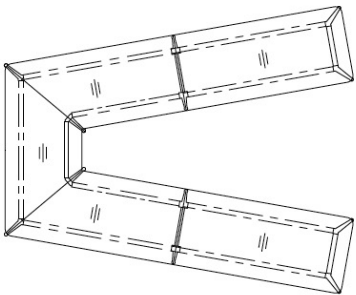

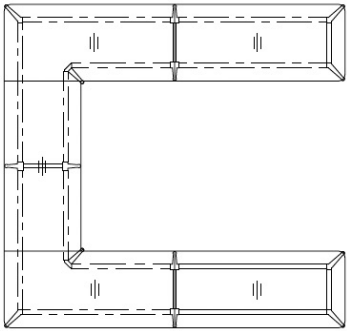

Ordering notes

The following criteria are required for planning customized table systems:

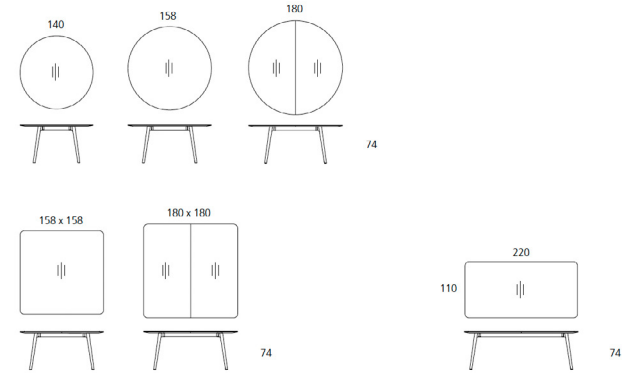

1. Room size
2. Number of seats, seat width 75, 80, 85 cm
3. Table top geometry
4. Table top finishes
5. Plug management (number of power and data connections)

Conference table systems

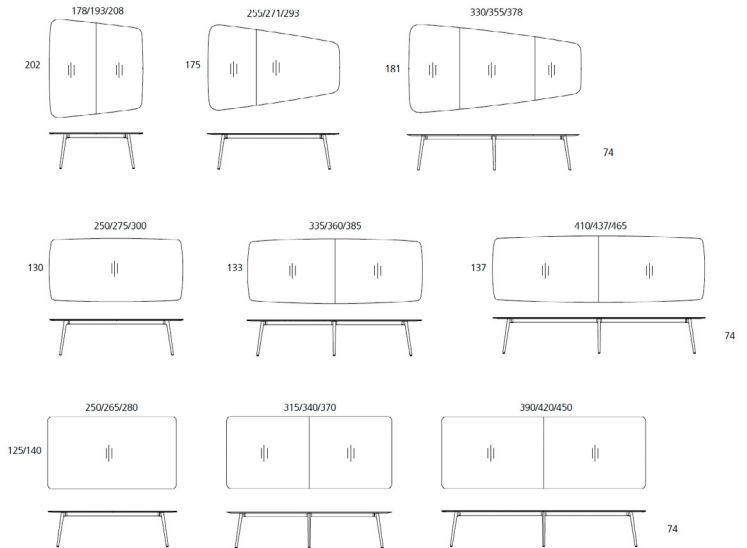

Notes: Available on request. We would be pleased to help you plan your individual conference table system. Please contact the company back office.

Meeting tables / visitors tables

Conference tables

Notes: The indicated dimensions refer to the seat width 80. Please contact the company back office for technical measurements.
