INTELLIGENT CONTROL OF WIND AND SHADOW

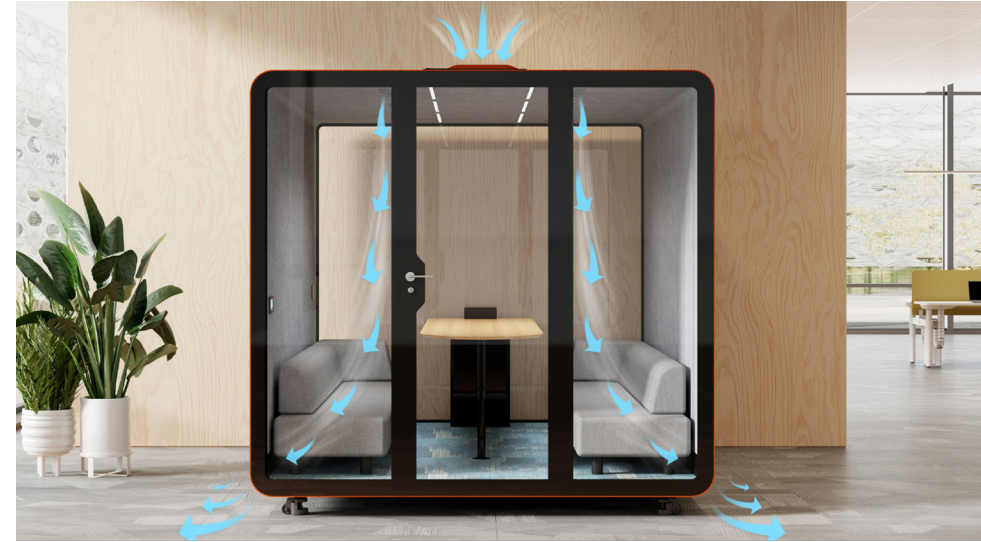

The Telebooth offers a sleek design that delivers privacy and acoustic comfort in open-plan spaces. Crafted from precision sheet metal with eco-friendly finishes, it features double-glazed doors, a flame-retardant sound-absorbing interior, and a solid red cherry foldable table. Automatic lighting, ventilation, and comfortable seating complete the refined, functional design.

STOP THE NOISE

A high-performance soundproof pod designed for focused calls, meetings, or solo work. Featuring smart lighting and ventilation, it provides a private, distraction-free environment that enhances comfort and productivity in open-plan offices.

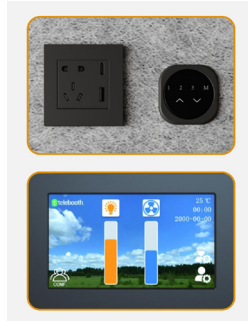

Built with multiple layers of advanced acoustic technology, including 9 mm sound-absorbing panels, it delivers exceptional noise isolation to keep every distraction out and every conversation private.

An intelligent motion-sensing system detects human presence and even subtle movements like breathing, ensuring the lighting remains on while the booth is in use.

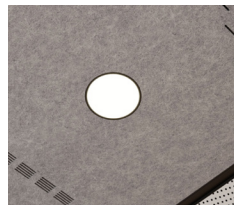

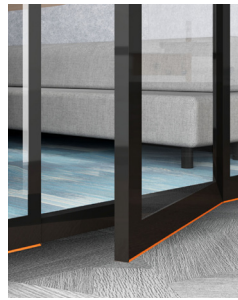

An automatic fresh air system delivers up to 330 cubic metres of clean air each hour, ensuring a comfortable and refreshing workspace.

Equipped with power outlets and USB charging ports, the booth keeps personal devices powered. A touch-integrated control panel allows precise adjustment of lighting and airflow, ensuring every detail is tuned for comfort and functionality.

Featuring a concealed mechanism, the door closes automatically and softly, providing quiet protection while maintaining a perfect balance between safety and convenience.

A comfortable and safe space that supports wellbeing and sustainability, blending environmental performance with thoughtful design.
