Create

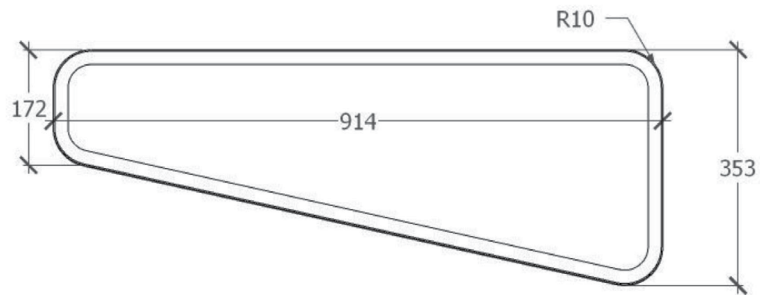

GROVE planter with watertight insert container for direct planting.
Mild steel base and body, 3mm recycled and recyclable ABS plastic insert.
For best results, to avoid over heating of your plants, consider placement away from direct sunlight.
Provided ABS plastic container will aid plants comfort, due to the air gap allowance to all sides of the steel body.
It is also highly recommended to sanitize your planter before use and before changing the plant to a new one.

Specifications

Finish: Textured white, textured black, satin navy or satin terracotta power coat colors with black tray and feet.

Size: In mm
Standard Size 794mm H x 353mm D x 914mm W
