Course aim:

This course provides a rare opportunity for you to hear from experts and demystify the key elements to effective research translation, implementation and health service improvement.

It will empower you to bridge the gap between your research and practical applications that improve healthcare and save lives.

You will learn how to:

- Create impact-driven research
- Engage stakeholders effectively
- Involve consumers in your research
- Collaborate with policymakers
- Harness the power of co-design
- Apply implementation science principles
- Measure project value and impact
- Communicate your research's impact
- + More!
