

SAFETY POLICY

Policy Statement

Master Builders SA is committed to ensuring all Staff are provided with a working environment that is free from unacceptable risks to health and safety. To achieve this outcome, Master Builders AS will introduce a work, health and safety (WHS) system which provides for:

- Identification and assessment of hazards and risks
- Instruction and training, where applicable
- Co-operation and co-ordinator
- Monitoring of the work environment
- PPE, where applicable

Policy Objectives

The objectives of this policy are to ensure, so far as is reasonably practicable, that:

- Staff and other persons are protected against harm to their health and safety through the elimination or minimisation of risks arising from work
- Safe systems of work, equipment and chemicals are provided
- Effective consultation, co-ordination and communication with other duty holders and Staff in relation to workplace health and safety are established.
- Adequate information, instruction, training and supervision is provided for a safe and healthy workplace
- WHS legislation and other relevant laws that relate to health and safety are complied with
- Injured staff are provided with adequate injury management to enable them to remain at work or return to work at the earliest opportunity.
- Ongoing actions are developed to prevent incidents or their recurrence

Policy Review

To ensure that the WHS system remains effective in providing a safe and healthy work environment, Master Builders SA WHS system will be reviewed periodically. This review will focus on the effectiveness of individual elements of the system, the relevance of changes to Commonwealth and State WHS legislation which may have occurred, and any other matters which potentially impact on the system.

Ian Markos
Chief Executive Officer
