

POWERFILM BALE WRAP

BALE NET REPLACEMENT FILM

Made in EU

UniPak is proud to present *PowerFilm*.

PowerFilm provides a high-strength wrapping solution for film on film applications. High grade LLDPE film offers high tear resistance and perfect adherence. Designed for the new generation combination baler – wrapper, *PowerFilm* is an excellent net replacement film. With the extra layers of film instead of net, the permeation of air into the silage bales is reduced, aiding in the delivery of better fodder.

PowerFilm is currently available in 2 widths (1.28m and 1.38m) for e2e coverage as well as over-edge when required (dependant on your equipment). Allow *PowerFilm* to protect your valuable hay and silage resources.

- perfect adherence
- high holding force
- high tear resistance
- environmentally friendly recycling
