Join Peel-Harvey Catchment Council for this one day workshop with one of Australia's leading Agricultural innovators and current Bob Hawke award winner for excellence in sustainable agriculture, Bruce Maynard. Over 30 years Bruce has pioneered the fields of No Kill Cropping, Stress Free Stockmanship, Self Herding and Grassland Grain.

This practical workshop will provide a great opportunity to get an insight into Stress Free Regenerative Land and Livestock Management, see Bruce in action, and to hear how he has implemented these strategies on his own farm, with plenty of time to ask questions throughout the day.

Bruce is one of Australia's most innovative Agricultural systems thinkers who shares his unique journey of implementing and inventing breakthrough land management techniques transforming his own farm at Narromine, NSW.

Bruce invented the No Kill Cropping system, developed Stress Free Stockmanship and co-invented Self Herding. He travels Australia and overseas enjoying being a passionate and impartial voice in the promotion of agroecology that increases the diversity of communities and landscapes.

Bruce's work can be readily found on the web at: [theagtoolshed.com](https://theagtoolshed.com) and was recognized as Australia's leading landcarer with the 2022 Bob Hawke Award for excellence in sustainable farming.

This event is supported by RegenWA, the WA Regenerative Livestock Producers Inc, and the Peel-Harvey Catchment Council
