

# Nutrient calculator webinars

Previous participants of the fertiliser management program through Healthy Estuaries WA and Soil Wise are invited to online refresher sessions on how to use the nutrient calculator.

**The specialised nutrient calculator for south-west WA pastures in the high rainfall zone is an online tool to help inform your fertiliser strategies.**

In these webinars, DPIRD representatives will guide you on how to input your own soil test results into the calculator, select the right fertiliser and calculate the application rate needed. The team will be able to answer your questions about how to get the most from your soil test results using the calculator.

Option 1: **Tuesday 13 February 1-2pm**
