SYNERGEX HOLDINGS PTY LTD, ABN 94 685137 900, UNIT 3/1 STATION STREET, SUBIACO, 6008

Delivering Transformational Change

CARBON NEUTRALITY

Approach

We support our clients on the path to carbon neutrality with practical, measurable solutions. Our approach combines solar technology, system optimisation, and energy strategy to help businesses reduce emissions, offset usage, and take meaningful steps toward sustainability.

Every project is tailored to the client's site, goals, and regulatory environment to ensure real progress and long-term impact.

THE SYNERGEX SYSTEM

Develop, Install, & Monitor

From planning through to performance, we manage the entire solar process in-house. Our end-to-end service ensures your system is designed for efficiency, installed to the highest standard, and monitored for long-term reliability.

Commercial Solar Specialists

ABOUT SYNERGEX

What Drives Us

Empowering a sustainable future through innovative solar solutions, expertly installed and supported by exceptional customer service, to drive energy independence, reduce carbon footprints, and promote environmental stewardship for homes, businesses, and our communities.

DELIVERING PROJECTS AND VALUE

Experienced Team

Our team brings decades of combined experience across electrical, solar, and infrastructure projects. We've worked across sectors and site complexities, delivering reliable results on time and on budget. It's this depth of experience that allows us to design smarter, solve problems quickly, and build strong relationships with clients and contractors alike.

Commercial Solar

ENERGY THAT WORKS HARDER

Smart Energy for Smarter Businesses

Synergex helps commercial clients reduce operational costs and improve sustainability with tailored solar solutions.

Whether you run an office, retail outlet, or mixed-use site, we'll design a system that delivers dependable returns and lower energy bills - all without disrupting your day-to-day operations.

BUILT FOR LONG-TERM VALUE

Proven Performance

With deep experience across WA's commercial landscape, we understand the balance between performance, payback period, and aesthetic integration.

Synergex designs systems that meet your energy goals now - and scale with you into the future.

Industrial Solar

SYNERGEX

Powering Industry with Smarter Solar

Synergex delivers large-scale solar systems built to support the high energy demands of industrial operations. From manufacturing plants to logistics hubs, our tailored systems are designed for performance, scale, and reliability.

By combining solar generation with battery storage and smart demand management, we help reduce your energy costs and protect your operations from grid disruptions.

EXPERIENCED

Large-Scale Capability, Local Focus

Our team has extensive experience in delivering MW-scale systems across WA's industrial sector. We work alongside your engineers and facilities team to develop solutions that deliver long-term returns - with minimal downtime and maximum control.

Off-Grid Solar

RELIABLE POWER. ANYWHERE.

Tailored Solutions for Remote Sites

Synergex designs and delivers fully self-sufficient solar systems for remote and off-grid locations across Western Australia. Whether you're powering agricultural operations, regional facilities, or infrastructure in isolated areas, we build systems that keep you running - without the grid.

BUILT FOR WA CONDITIONS

Energy Independence Starts Here

Off-grid solar eliminates the need for costly grid extensions and noisy diesel generators.

With integrated battery storage, smart design, and proven reliability, Synergex ensures your site has clean, consistent power - day and night.
